

## **Gogo Conducts First Successful Test Flight on its Next Generation ATG Network**

October 31, 2017

CHICAGO, Oct. 31, 2017 /PRNewswire/ --Gogo (NASDAQ: GOGO), the leading global provider of broadband connectivity products and services for aviation, announced it has conducted its first successful test flight and has begun the nationwide rollout of its new regional Air-to-Ground (ATG) inflight network called ATG-NG.

The ATG-NG network combined with Gogo's proprietary aero antenna, in-cabin network and software platform will bring up to 30 times more bandwidth to an aircraft than our original ATG solution. Once the network upgrades are complete, Gogo will have a North American ATG solution that will deliver performance on the aircraft that is comparable to Gogo's 2Ku global satellite solution.

The ATG-NG network will have peak capacity of more than 100 Gbps. When combined with our global satellite network, Gogo will have the highest capacity network ever built that's dedicated to serving aviation.

"Gogo is the Inflight Internet Company. By leveraging our existing network, ATG-NG delivers more bandwidth at much lower costs," said Michael Small, Gogo's president and CEO.

ATG-NG utilizes unlicensed spectrum in the 2.4GHz spectrum band as well as the licensed spectrum from Gogo's original ATG network to provide greater bandwidth and reliability. It also leverages Gogo's existing ATG network backhaul and infrastructure of more than 250 cell towers. On the aircraft, Gogo has developed a proprietary new antenna and modem that will produce peak speeds of more than 100 Mbps per aircraft.

The solution will be ideal for business aviation aircraft, commercial regional jets and select mainline aircraft operating in the U.S. For business aviation aircraft, this service will be available as an upgrade to aircraft already equipped with Gogo's Avance L5 connectivity solution. For commercial aviation, any aircraft outfitted with equipment designed to leverage Gogo's first generation ATG network will simply need to be outfitted with a new modem and blade antenna to take advantage of the new service. The network will be available in 2018.

### **About Gogo:**

Gogo is the Inflight Internet Company. We are the leading global provider of broadband connectivity products and services for aviation. We design and source innovative network solutions that connect aircraft to the Internet and we develop customizable services for our aviation partners. Once connected, we provide industry leading reliability around the world. Our mission is to help aviation go farther by making planes fly smarter, so our aviation partners perform better and their passengers travel happier.

You can find Gogo's products and services on thousands of aircraft operated by the leading global commercial airlines and thousands of private aircraft, including those of the largest fractional ownership operators. Gogo is headquartered in Chicago, IL with additional facilities in Broomfield, CO and locations across the globe. Connect with us at [gogoair.com](http://gogoair.com).

### **Cautionary Note Regarding Forward-Looking Statements**

Certain disclosures in this press release include "forward-looking statements" that are based on management's beliefs and assumptions and on information currently available to management. Most forward-looking statements contain words that identify them as forward-looking, such as "anticipates," "believes," "continues," "could," "seeks," "estimates," "expects," "intends," "may," "plans," "potential," "predicts," "projects," "should," "will," "would" or similar expressions and the negatives of those terms that relate to future events. Forward-looking statements involve known and unknown risks, trends and uncertainties, many of which may be beyond our control, that may cause Gogo's actual results, performance or

achievements to be materially different from any projected results, performance or achievements expressed or implied by the forward-looking statements. Such risks, trends and uncertainties include those described under the heading "Risk Factors" in the Company's Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission ("SEC") on February 24, 2017 and its Quarterly Report on Form 10-Q for the quarter ended March 31, 2017 filed with the SEC on May 4, 2017. Forward-looking statements represent the beliefs and assumptions of Gogo only as of the date of this press release and Gogo undertakes no obligation to update or revise publicly any such forward-looking statements, whether as a result of new information, future events or otherwise.
