

## **Gogo announces EASA STC for Gogo Galileo HDX antenna for Bombardier Global aircraft, granted to QCM Design**

September 22, 2025

**BROOMFIELD, Colo., Sept. 22, 2025 (GLOBE NEWSWIRE) -- Gogo (NASDAQ: GOGO) announced today that Switzerland-based QCM Design has received European Union Aviation Safety Agency (EASA) approval for a Gogo Galileo HDX Antenna Supplemental Type Certificate (STC). The QCM Design-developed STC supports retrofit installation for Bombardier Global 5000 and Global 6000 series aircraft.**

The STC, which was developed in collaboration with Germany's ACC Columbia Jet Service, covers the Global Express, Global Express XRS, Global 5000, Global 6000, Global 6500 and Global 6500. As part of the STC process, ACC Columbia completed the first system installation on a Bombardier Global 5000 operated by Skyside, the Austria-based charter and aircraft management company.

Skyside passengers are now benefitting from uninterrupted, global, high-speed consistent connectivity via the Eutelsat OneWeb LEO satellite network. The purpose-built for business aviation terminal enables seamless web browsing, video conferencing, streaming, email, and much more.

"We are extremely proud to confirm this STC and look forward to working with Gogo customers seeking to upgrade their existing connectivity services or take the first step in optimizing this innovative new technology," says Christian Schusser CEO of QCM Design. "The compact ESA and simplicity of the hardware installation belie the power of its connectivity provision. We know that Global series aircraft owners will welcome reliable, consistent high-speed broadband services to keep them continuously productive and entertained as they travel."

The Skyside aircraft was modified with the Gogo AVANCE SCS platform in the summer of 2024, and with the addition of the Gogo Galileo HDX antenna, passengers will now enjoy a terrestrial-like digital experience in the air. "Gogo Galileo, combined with the already activated Gogo Vision 360 as part of the installed AVANCE SCS package, will provide Skyside customers with market-leading connectivity and IFE provision," says Dave Falberg, Senior VP Sales – EMEA APAC, Gogo. "The addition of the HDX system will ensure Skyside passengers can stay productive, entertained, and relaxed during flight. Passengers expect connectivity to always work, which is why the service is supported by global 24/7/365 support, cybersecurity monitoring and other added value services. This enhances the service value for Skyside, and hence the passenger experience."

QCM Design expects approval from other regulators, including the Federal Aviation Administration (FAA) and Transport Canada Civil Aviation (TCCA), will follow the initial EASA approval. The STC development builds on ACC Columbia's existing relationship with Gogo. ACC Columbia was the first European MRO to install the Gogo Plane Simple Ku-band tail mount terminal on a Bombardier Global Express in Europe. Customers can now pre-order the installation for their Bombardier Global business jets from ACC Columbia at their Hanover and Cologne/Bonn airport facilities.

## Cautionary Note Regarding Forward-Looking Statements

Certain disclosures in this press release include forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements regarding our business outlook, industry, business strategy, plans, goals and expectations concerning our market position, international expansion, future technologies, future operations, margins, profitability, future efficiencies, capital expenditures, liquidity and capital resources and other financial and operating information. When used in this discussion, the words “anticipate,” “assume,” “believe,” “budget,” “continue,” “could,” “estimate,” “expect,” “forecast,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “will,” “future” and the negative of these or similar terms and phrases are intended to identify forward-looking statements in this press release.

Forward-looking statements are based on our current expectations regarding future events, results or outcomes. These expectations may or may not be realized. Although we believe the expectations reflected in the forward-looking statements are reasonable, we can give you no assurance these expectations will prove to have been correct. Some of these expectations may be based upon assumptions, data or judgments that prove to be incorrect. Actual events, results and outcomes may differ materially from our expectations due to a variety of known and unknown risks, uncertainties and other factors. Although it is not possible to identify all of these risks and factors, they include, among others, our ability to effectively evaluate and pursue strategic opportunities.

Additional information concerning these and other factors can be found under the caption “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2023, as filed with the Securities and Exchange Commission (the “SEC”) on February 28, 2024, and in subsequent Quarterly Reports on Form 10-Q as filed with the SEC on May 7, 2024 and August 7, 2024.

Any one of these factors or a combination of these factors could materially affect our financial condition or future results of operations and could influence whether any forward-looking statements contained in this report ultimately prove to be accurate. Our forward-looking statements are not guarantees of future performance, and you should not place undue reliance on them. All forward-looking statements speak only as of the date made and we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.
