

Gogo Surpasses 2,000 Gogo Vision Equipped Aircraft

February 4, 2016

Gogo Vision Product Rapidly Changing Traditional IFE Landscape

CHICAGO, Feb. 4, 2016 /PRNewswire/ -- Gogo (NASDAQ: GOGO), the global leader in providing broadband connectivity solutions and wireless entertainment to the aviation industry, announced today that its Gogo Vision product has been installed on more than 2,000 aircraft. The technology is disrupting the traditional "seat-back solution" model and has Gogo operating with scale as large as some of the biggest in-flight entertainment companies. Gogo is now the leading provider of wireless in-flight entertainment by a large margin and is making gains on becoming the largest in-flight entertainment provider in the world.

"We know that passengers want entertainment on their own devices. We also know that almost everyone boards a plane with at least one Wi-Fi enabled device. Gogo Vision was built to take advantage of this trend," said Ash EIDifrawi, Gogo's chief commercial officer. "It has become successful because weight matters in aviation. When compared to traditional in-flight entertainment solutions, Gogo is much lighter weight, requires less maintenance and is lower cost."

More than 2,200 commercial aircraft are outfitted with the technology and more than 1 million videos are being watched through Gogo Vision each month.

The video content is stored on a server on the plane and delivered to a passenger's own device through Gogo's in-cabin network. In the past year alone, Gogo added its Gogo Vision product to more than 1,000 aircraft including aircraft operated by most major U.S. airlines.

"We continue to develop digital products and services that leverage our connectivity technology in support of our mission: to advance aviation by connecting every aircraft," added EIDifrawi. "Whether that's giving passengers access to the Internet and a host of in-flight entertainment options or building products and services that support airline operations, we continue to build products and services that are advancing aviation."

To use Gogo Vision the next time you are on a Gogo Vision flight, download the Gogo Vision app [here](#).

About Gogo

With more than two decades of experience, Gogo is the leader in in-flight connectivity and wireless entertainment services for commercial and business fleets around the world. Gogo connects aircraft, providing its aviation partners with the world's most powerful network and platform to help optimize their operations. Gogo's superior technologies, best-in-class service, and global reach help planes fly smarter, our aviation partners perform better, and their passengers travel happier.

Today, Gogo has partnerships with 12 commercial airlines and is installed on more than 2,500 commercial aircraft. More than 6,800 business aircraft are also flying with its solutions, including the world's largest fractional ownership fleets. Gogo also is a factory option at every major business aircraft manufacturer. Gogo has more than 1,000 employees and is headquartered in Chicago, IL, with additional facilities in Broomfield, CO, and various locations overseas.
