

Gogo to partner with Air Canada on Expanding In-Flight Connectivity to its International Fleet

March 21, 2016

CHICAGO, March 21, 2016 /PRNewswire/ -- Gogo Inc. (NASDAQ: GOGO), the global leader in providing broadband connectivity solutions and wireless in-flight entertainment to the aviation industry, announced today that it has expanded its connectivity partnership with Air Canada to include its international fleet, including the Boeing 787.

Air Canada is the only Canadian carrier offering customers in-flight Wi-Fi connectivity across its entire fleet of narrow-body aircraft in North America. Under the new agreement, Gogo's 2Ku connectivity technology will be installed on Air Canada's wide-body international aircraft, starting with the Boeing 777 this fall.

"We are excited about extending our relationship with Air Canada to bring our 2Ku technology to its international fleet," said Gogo's president and CEO, Michael Small. "The performance of Gogo's 2Ku technology is unmatched in global aviation today and is built on the concept of an open system with the ability to leverage dozens of Ku-band satellites in orbit. We've also built it to leverage any of the new Ku-band LEO satellite constellations coming on line in the future. This system design will enable Air Canada to continue to deliver industry leading connectivity to its passengers for the foreseeable future.

"Air Canada is pleased to announce it will offer customers the ability to stay connected whenever and wherever they fly by extending in-flight, North American connectivity to its wide-body aircraft flying overseas using satellite technology," said Benjamin Smith, President, Passenger Airlines at Air Canada. "While business travelers will welcome satellite Wi-Fi service as a productivity tool, it will have widespread appeal for all travelers by allowing them to stay in touch, access the internet and enjoy additional entertainment options throughout their entire journey."

About Gogo

With more than two decades of experience, Gogo is the leader in in-flight connectivity and wireless entertainment services for commercial and business fleets around the world. Gogo connects aircraft, providing its aviation partners with the world's most powerful network and platform to help optimize their operations. Gogo's superior technologies, best-in-class service, and global reach help planes fly smarter, our aviation partners perform better, and their passengers travel happier.

Today, Gogo has partnerships with 14 commercial airlines and is installed on more than 2,500 commercial aircraft. More than 6,800 business aircraft are also flying with its solutions, including the world's largest fractional ownership fleets. Gogo also is a factory option at every major business aircraft manufacturer. Gogo has more than 1,000 employees and is headquartered in Chicago, IL, with additional facilities in Broomfield, CO, and various locations overseas.
