

Gogo's 2Ku Technology Takes Flight on Aeromexico

April 21, 2016

Gogo Vision also now Live on Select Aeromexico Boeing and Embraer aircraft

CHICAGO, April 21, 2016 /PRNewswire/ -- Gogo (NASDAQ: GOGO), the global leader in providing broadband connectivity solutions and wireless entertainment to the aviation industry, announced today that its industry leading global connectivity technology – 2Ku – is now live on Aeromexico. The first aircraft to fly with 2Ku is an Aeromexico Boeing 737-800 aircraft with Sky Interior serving several destinations in the Americas. Today, the airline has five aircraft installed with the new 2Ku system.

"This is a groundbreaking milestone for Gogo as it signifies that the 2Ku era has officially taken flight," said Michael Small, Gogo's president and CEO. "Aeromexico was the first to commit to the service and we couldn't be more excited to have their passengers be the first to experience this game changing technology."

The 2Ku service will be free on Aeromexico for a limited time. In addition to 2Ku, Gogo's wireless in-flight entertainment solution, Gogo Vision, is now flying on 11 Boeing 737-700 and Embraer aircraft flying across Aeromexico's regional network.

"As Mexico's global airline, we continue to push the envelope in terms of improving the passenger experience," said Andres Conesa, Aeromexico's CEO. "This partnership will bring the best connectivity technology to our passengers so they can stay connected within Mexico and abroad."

Gogo's 2Ku technology is designed to be open so it's compatible with multiple satellite networks, which means the technology will be upgradeable over time without having to touch the aircraft. This flexibility will help ensure Aeromexico is future ready and ahead of the curve from a technology perspective.

"The great news for Aeromexico is they get a leading technology today that will only get better in the near future as newer high-throughput satellites come online," added Small.

About Gogo

With more than two decades of experience, Gogo is the leader in in-flight connectivity and wireless entertainment services for commercial and business fleets around the world. Gogo connects aircraft, providing its aviation partners with the world's most powerful network and platform to help optimize their operations. Gogo's superior technologies, best-in-class service, and global reach help planes fly smarter, our aviation partners perform better, and their passengers travel happier.

Today, Gogo has partnerships with 14 commercial airlines and is installed on more than 2,500 commercial aircraft. More than 6,800 business aircraft are also flying with its solutions, including the world's largest fractional ownership fleets. Gogo also is a factory option at every major business aircraft manufacturer. Gogo has more than 1,000 employees and is headquartered in Chicago, IL, with additional facilities in Broomfield, CO, and various locations overseas.
