

Gogo Partners with China Telecom Satellite

August 15, 2016

Receives Regulatory Approval to Begin Providing In-flight Connectivity Service over China

CHICAGO, Aug. 15, 2016 /PRNewswire/ -- Gogo (NASDAQ: GOGO), the global leader in providing broadband connectivity solutions and wireless entertainment to the aviation industry, announced today that it has received regulatory approval from the various Chinese regulatory bodies through its local partner China Telecom Satellite, and will work with China Telecom Satellite to offer in-flight connectivity service on International flights operating in and out of China starting in October.

"This is really a ground-breaking moment as we expand our global reach as an organization into China and other parts of the world. For passengers on Gogo equipped flights currently flying into China, this means they will be able to enjoy seamless service once they reach Chinese air space," said Gogo's president and CEO, Michael Small. "We believe China Telecom Satellite will be a very strong and effective partner for China's in-flight communication market and both parties will extend the cooperation to Chinese airlines in the future."

"Gogo is a world-leading in-flight connectivity service provider and we look forward to a partnership that takes full advantage of our respective abilities to deliver superior in-flight connectivity service for both International and Chinese airlines," said Lv Junli, president of China Telecom Satellite.

Gogo currently has one International airline partner operating with service to China, and recently announced it has signed a term sheet with Beijing based Shareco Technologies to install its 2Ku in-flight connectivity technology on 50 commercial aircraft for Shareco's airline partners, including Hainan Airlines and Beijing Capital Airlines. In addition to in-flight connectivity, Gogo will also provide its wireless in-flight entertainment solution – Gogo Vision – for Shareco to install on these aircraft.

About Gogo

With more than two decades of experience, Gogo is the leader in in-flight connectivity and wireless entertainment services for commercial and business fleets around the world. Gogo connects aircraft, providing its airlines partners with the world's most powerful network and platform to help optimize their operations. Gogo's superior technologies, best-in-class service, and global reach help planes fly smarter, airlines partners perform better, and their passengers travel happier.

Today, Gogo has partnerships with 17 commercial airlines and has installed in-flight connectivity technology on more than 2,800 commercial aircraft. More than 7,000 business aircraft are also flying with its solutions, including the world's largest fractional ownership fleets. Gogo also is a factory option at every major business aircraft manufacturer. Gogo has more than 1,000 employees and is headquartered in Chicago, IL, with additional facilities in Broomfield, CO, and various locations overseas.
