

Gogo Business Aviation Now Enabling Open Router Environment

August 23, 2016

Routers from third-party manufacturers now enabled on Gogo Biz Network

BROOMFIELD, Colo., Aug. 23, 2016 /PRNewswire/ -- Gogo Business Aviation (NASDAQ: GOGO), a leader in connected airplanes, has embarked on an initiative to enable operators, dealers and installers to equip their aircraft with approved routers from third-party manufacturers that best suit their individual needs and preferences on the Gogo Biz network. The move is part of a larger initiative to provide a more open ecosystem, enabling a wider array of router options for customers to choose from.

"Gogo is at the forefront of the aircraft connectivity space, and with many aircraft-approved routers now available in the marketplace, we have created a process to offer our customers additional options – giving them the power to select a router that meets their specific needs," said Sergio Aguirre, senior vice president of product management and business development for Gogo. "By opening the router to other providers, we've streamlined the ability for our customers to leverage Gogo's world-class network and interoperate with our solutions for the best possible experience."

Going forward, customers will be allowed to select a router from a list of authorized providers. Gogo will work closely with third-party manufacturers to test and approve routers that will interface with Gogo's suite of air-to-ground products. To ensure the highest quality user experience, providers will be fully evaluated and type certified on Gogo's system.

"We have always stood up for our customers and we will continue to advocate for the best customer experience possible," said David Glenn, vice president of customer operations. "An open router environment allows us to continue to build on the standard of excellence our customers expect."

For router providers interested in working with Gogo, contact customer service at +1-303-301-3278 or at customerservice@gogoair.com.

About Gogo

With more than two decades of experience, Gogo is the leader in in-flight connectivity and wireless entertainment services for commercial and business aircraft around the world. Gogo connects aircraft, providing its aviation partners with the world's most powerful network and platform to help optimize their operations. Gogo's superior technologies, best-in-class service, and global reach help planes fly smarter, our aviation partners perform better, and their passengers travel happier.

Today, Gogo has partnerships with 17 commercial airlines and is now installed on more than 2,700 commercial aircraft. More than 7,000 business aircraft are also flying with its solutions, including the world's largest fractional ownership fleets. Gogo also is a factory option at every major business aircraft manufacturer. Gogo has more than 1,000 employees and is headquartered in Chicago, IL, with additional facilities in Broomfield, CO, and various locations overseas.
